## Made By Hands Pops Out

**M**ade By Hands introduces five new art activity kits based on its "pop-out" concept. An array of die-cut, geometric, and whimsical cardboard shapes, pop-outs allow kids to create easily and independently without a grown-up's help. The sturdy cardboard cases, complete with a handle, make them portable.

Using Matisse- and Picasso-esque pop-outs, children will be able to create their own artistic masterpieces with **Make-Your-Own Masterpieces**. Each set comes with three different-sized, freestanding, easel-back cardboard canvases.

**Make It-Trade It Sports Cards** fosters collecting, but also pushes it to a whole new level. Now young sports enthusiasts can use sports-themed pop-outs to create their own personalized sports cards of their favorite athletes.

The new Go Figure line includes three collage-constructing card games: **Go Figure—Crazzzy Critters**, **Go Figure—Silly Bodies**, and **Go Figure—Way to Go**. Each game comes with a set of shape cards that players take turns putting together in order to make an image their opponents will recognize. Depending on which game version is being played, players try to make either a crazy critter, a silly body, or a mode of transportation. The first one finished shouts out, "go figure!" There are many other variations of play. Deal out all the shape cards to each player and see how many figures each player can make, play in teams, beat the clock, or simply play solitaire.
